

Hermes™

Hermes™ and Pegasus™ are the first truly portable professional wireless tuners (0.9lb. and 0.5lb.). These two new UHF/VHF multi-channel tuners can be used in conjunction with any monitor.

Hermes™ and Pegasus™ reception is highly stable thanks to the digital tuning and true synchronous demodulator.

Pegasus™ is much more compact than Hermes™ since it does not feature the battery compartment, nor the XLR4 power plug. It operates on 8-28v DC via a Hirose 6 connector.

Hermes™ is more universal: it receives 8-28v DC power in 3 different ways: via an XLR4 plug or a Hirose 6 connector and it will run for over 8 hours on 8 AA batteries.
